```
================================================================================
Project Code: BYUC0007
Project Name: Pope and Karpowitz Survey
Prepared for: Jeremy Pope
Interviews: 3000
Field Period: August 14, 2015 to August 26, 2015
Project Manager: Sam Luks — 650.462.8009
================================================================================
```

YouGov interviewed 3099 respondents who were then matched down to a
sample of 3000 to produce the final dataset. The respondents were
matched to a sampling frame on gender, age, race, education, marital status,
party identification, ideology, and political interest. The frame was
constructed by stratified sampling from the full 2010 American
Community Survey (ACS) sample with selection within strata by weighted
sampling with replacements (using the person weights on the public use
file). Data on voter registration status and turnout were matched
to this frame using the November 2010 Current Population Survey.
Data on interest in politics and party identification were then
matched to this frame from the 2007 Pew Religious Life Survey. The
matched cases were weighted to the sampling frame using propensity
scores. The matched cases and the frame were combined and a logistic
regression was estimated for inclusion in the frame. The propensity
score function included age, gender, race/ethnicity, years of
education, and ideology. The propensity scores were grouped into
deciles of the estimated propensity score in the frame and
post-stratified according to these deciles.

                         Variable List
